

UNIVERSITY OF
HOHENHEIM

CURRICULUM | WINTER SEMESTER 2024/25

Environmental Protection and Agricultural Food Production

Master of Science

Faculty of Agricultural Sciences | As of September 2024

Preamble

This curriculum provides applicants and students as well as teaching and administrative staff with comprehensive information about the M.Sc. program "Environmental Protection and Agricultural Food Production". It contains information about the course structure and summarizes the most important exam regulations (issued the 23rd and 25th of July 2024).

The information presented reflects the current situation. Titles and contents of compulsory and optional modules are sometimes subject to change. Due to administrative reasons such changes can only be included in printed materials with a delay. For this reason, all information is supplied without liability.

If in doubt, please contact the coordinator of the program (envirofood@uni-hohenheim.de) to obtain up-to-date information. For up-to-date module descriptions please refer to the website at uni-hohenheim.de/en/module-catalogue. Time schedules and lecture halls for all courses are displayed in the Course Catalogue of the University of Hohenheim, available at the beginning of each semester online on the university's homepage: uni-hohenheim.de/en/course-catalog

The Master's Program Environmental Protection and Agricultural Food Production (EnviroFood)

1 PROGRAM OBJECTIVES

How can we provide for the world's population today without exhausting the natural resources required by generations to come? This is one of the most pressing problems for humankind to solve. Food production relies increasingly on technical means of production and is already straining our natural resources to their limit. Nevertheless, food production is being intensified and the globalization of markets is speeding up this process. One of this century's major challenges is to intensify food production in an environmentally friendly and sustainable way. Complex problems particularly arise on the periphery of densely populated areas, where competing forms of land use have to be balanced (e.g. settlement, recreation, waste disposal). When attempting to handle these problems, we not only have to consider scientific and technical aspects, but also socio-economic, political, and legal ones. To this end, the University of Hohenheim has developed its M.Sc. program "Environmental Protection and Agricultural Food Production" (EnviroFood).

The full program is composed of 4 semesters each with 30 ECTS credits. The language of instruction is English and the program can be started in October (winter semester) each year.

2 MODULES

2.1 What is a Module?

A module is a teaching unit and can consist of several courses (lecture, seminar, excursion, practical exercises...). Modules at the University of Hohenheim correspond to 6 ECTS credits (unblocked modules) or 7.5 ECTS credits (blocked modules). A few modules with higher work load correspond to 12 or even 15 credits. (See also chapter 2.4)

A detailed description on the content and structure of each module is found in the Module catalogue uni-hohenheim.de/modulkatalog#Master

2.2 Modules and associated workload

Students earn ECTS credits for the workload associated with each module (1 ECTS credit = 30 h workload). A module of 6 credits corresponds to a workload of 4 SWS (4 weekly semester hours / 56 total contact hours). A module of 7.5 credits corresponds to a workload of 5 SWS (5 weekly semester hours / 70 total contact hours). In addition, each credit requires preparation time, summing up to a total workload of about 180 hours for one module of 6 credits and 225 hours for one module of 7.5 credits.

The M.Sc. program has a requirement of 120 credits in total (90 credits from course work, 30 credits for the Master's thesis).

2.3 Modules per semester

A typical semester consists of 30 credits, and is either composed of 5 unblocked modules, (6 credits each) or 4 blocked modules (7.5 credits each). Typically, the modules are completed in the first three semesters, followed by the Master's thesis in the fourth semester. However, the examinations regulations allow a certain degree of flexibility. For details, refer to uni-hohenheim.de/en/examination.

2.4 Blocked and unblocked modules

The University of Hohenheim offers two different types of modules: unblocked modules and blocked modules. Unblocked modules correspond to a workload of 6 credits and blocked modules to a workload of 7.5 credits.

2.4.1 Unblocked Modules

Unblocked modules are based on 4 contact hours per week for the whole semester period. They end with an exam at the end of the semester.

2.4.2 Blocked Modules

Blocked Modules are composed of 3 weeks of daily instruction (usually 5 hours per day) followed by one week of individual preparation, ending with a final exam at the end of the 4th week. Blocked modules correspond to a higher workload than unblocked modules, and are therefore worth 7.5 credits. However, mixing blocked and unblocked modules in one semester it is not recommended, as lectures and lesson follow-up may overlap significantly.

2.5 Module Categories

Each Master's program consists of compulsory and elective modules; some study programs also include semi-elective modules. The credits of each module correspond to the workload and not to the category, i.e. an elective module with 6 credits has the equal weight as a compulsory module with regard to the final average grade.

2.5.1 Compulsory Modules

... are the modules providing the core knowledge of the study program. Those modules have to be completed to obtain the M.Sc. degree.

2.5.2 Semi-elective Modules

...are modules covering a wider range of content related to the aim of the study program. In some programs, a defined minimum number of modules out of a pool of semi-elective modules have to be chosen and completed. The EnviroFood Master's program requires the completion of four semi-elective modules.

2.5.3 Elective modules

...are modules chosen by the individual students, according to their interests. They are the modules outside of a program's compulsory modules, which contribute to the final total of 90 ECTS credits required for the achievement of an M.Sc. degree. They can be chosen from all Master's modules offered by the Faculty of Agricultural Sciences of the University of Hohenheim. On request, subject-related Master's modules offered from other faculties or other universities can also be chosen. Note: Bachelor's modules cannot be chosen as elective modules.

2.5.4 Additional modules

...are modules taken out of individual interest beyond the 90 ECTS coursework credits required for the completion of the degree. Credits from additional modules will not be included in the calculation for your final average grade. But, on request to the examinations office, they can be shown on your final transcript.

There are two special cases of elective modules, which are worth highlighting:

2.6 Portfolio Module (3000-410)

You can gain up to 7.5 credits (not graded) for extra-curricular activities like internships, participation in conferences, trainings or summer schools, language courses (max. 3 credits), writing research papers, courses on statistical programs or similar activities. These credits can replace an elective module. The detailed explanation is found in the module catalog under module code 3000-410.

2.7 English for Scientific Purposes (3000-420)

This module consists of four English courses of C1 level at the language center Hohenheim. You can choose from several courses and workshops and they can stretch over several semesters.

After completing the four courses/workshops you have to write an exam to obtain the UniCert III certificate. This module counts as an elective module and is the only way language courses can be recognized for your studies apart from the portfolio module. The detailed explanation is found in the module catalog under module code 3000-420

2.8 Certificate program for courses in Artificial Intelligence and Data Science in Hohenheim (AIDAHO)

The program is designed for students of all faculties: aidaho.uni-hohenheim.de/en/home. The aim of AIDAHO is to increase the expertise of its participants in the fields of Artificial Intelligence (AI), Data Science and Scientific Computing. Students can enroll in the certificate in addition to their main course of study. The AIDAHO courses can be taken in any order.

2.8.1 How to achieve the certificate

To successfully complete the program, students have to pass at least five AIDAHO modules (30 ECTS).

- There are **three mandatory basic modules** that all participants have to complete. The courses of these modules teach basic programming skills and statistic methods.
- In the **two semi-elective specialization modules** students can either deepen their methodological skills or choose to work on data projects in application seminars.

The following sections cover additional information about the basic and specialization modules. A complete list of all courses of all faculties in the AIDAHO program can be found here: aidaho.uni-hohenheim.de/en/courses

The basic modules contain three courses which all participants of the AIDAHO program have to pass:

Sem	Code	Name of Module	Duration	Credits	Professor
1 or 2	5000-300 (B.Sc.-level!)	Tools for AI & Data Science (no elective module, only additional for M.Sc.) *(AIDAHO-Basic)	1 Semester	6	Krupitzer/ Vogelgesang
2	4407-480	Introduction to Machine Learning with Python *(AIDAHO-Basic)	1 Semester e-learning	7.5	Stein
1/3	5107-410	Introduction to Applied Data Science *(AIDAHO-Basic)	1 Semester	6	Dimpfl

In the specializing part students enroll in two modules. At least one of them has to be an application course. Modules of this curriculum that apply to the AIDAHO certificate as a specialization module *(AIDAHO specialization) or application course *(AIDAHO application) are marked. All these modules

can be integrated into the Master's degree at the same time in accordance with the program-specific regulations.

Passed project works, seminar papers or theses, in which a substantial part was the quantitative data analysis or working with machine learning/artificial intelligence, can be credited as an "application course".

Questions about the AIDAHO certificate should be directed to aidaho@uni-hohenheim.de

2.9 Modules with limited numbers of participants

Some modules can accept only a limited number of participants due to space constraints or supervision regulations. It is necessary to register for such modules in advance. See also: uni-hohenheim.de/en/registration-for-modules.

If the number of participants is limited, this will be stated under the "comments" ("Anmerkungen") section of the module description. Please check before lectures start, whether the modules you have chosen have a limited number of participants or not (uni-hohenheim.de/en/module-catalogue). Each module is set up as a course on the e-learning platform ILIAS (ilias.uni-hohenheim.de). You have to register there and see how the spots for each course are allocated. Further instructions and information, e.g. how to contact the relevant lecturer or to join the waiting list are also available there. Generally, students for whom the respective module is compulsory or the last module that needs to be completed to finish a degree program will always be admitted. If you have not yet enrolled by the end of the registration period and do not yet have access to ILIAS, please contact the responsible lecturer by e-mail and ask for registration.

For blocked modules with a limited number of participants in block period 1, the registration starts at least two weeks before the start of the lecture period and ends eight days before the lecture period. For all other modules with a limited number of participants, the registration period starts at least one week before the start of the lecture period and ends at the end of the first week after the start of the lecture period.

2.10 Module codes

Each module and each course have a specific code. Example: 4902-440 Economics and Environmental Policy.

The first four digits represent the respective institute and the department or study field (i.e. of the responsible person / course instructor). The next three digits correspond to the type of module and the term, as well as the course.

4902 - 440 = institute number (490 Institute of Agricultural Sciences in the Tropics "Hans Ruthenberg Institute")

0002 - 000 = department within the institute (2 corresponds to the 2nd letter in the alphabet: B
-> department 490b International Agricultural Trade and Food Security)

0000 - **440** = module designation:
01 - 40 modules for Bachelor's students
41 - 80 modules for Master's students
81 - 90 modules for doctoral candidates

0000-011 = course 1 of a module (1 - 9 courses possible)

0 at the end of the code indicates that it is the module name. 1, 2 or 3 as last digit indicate that it is a course (sub-unit) within a module (tutorial, exercises, lectures, etc.)

The module 4902-440 Economics and Environmental Policy consists of four courses:

- 4902-441 Basic Microeconomics
- 4902-442 Environmental Policy
- 4902-443 Exercises to Basic Microeconomics
- 4902-444 Exercises to Environmental Policy

Note: It is important to check for the times and venues of all courses that belong to a module!

2.11 Individual Timetable

The Master's programs at the University of Hohenheim offer a high variety of different modules that can be chosen as elective modules. This allows for a personalized study profile with different specializations as well as for the creation of individual timetables depending on the choice of courses.

The Course Catalog of the University of Hohenheim contains information on times, lecturers, and lecture rooms of all courses, and is available at the beginning of each semester online on the University's homepage: uni-hohenheim.de/en/course-catalog. It is linked to the modules listed in the HohCampus Study Planner. A tool to compose a virtual individual timetable is also available on HohCampus [hohcampus.uni-hohenheim.de/en/hohcampus-help-schedule]. Please note: many modules consist of more than one course e.g. a lecture and a seminar (see above, module code explanation).

The lectures usually begin 15 minutes after the defined start time indicated in the course catalogue (c.t.=lat.: cum tempore = "with time"). Therefore, a lecture with a defined start time at 9 c.t. starts at 9:15. If a lecture starts on time at 9:00, there will be an indication 9 s.t. (lat.: sine tempore = "without time").

2.12 Evaluation of Modules

The quality of courses and modules is evaluated every year by the students of all study programs. The evaluation sheets are distributed on paper or sent as online links by email and evaluated by the Faculty of Agricultural Sciences. The results are sent back to the lecturers in an anonymous format. The lecturers are asked to discuss the results with the students at the end of their courses. This feedback is important for the Faculty to be able to continuously improve the study experience for our students.

3 EXAMINATIONS

Each module is completed with an examination. To be eligible for an exam, students must register for it on HohCampus during the designated registration periods. These periods are published on the examinations office website and in HohCampus. During the registration process, students have the option to choose whether the module should be categorized as semi-elective, elective, or additional (refer to chapter 2.5 Module Categories for more details). It is important to note that students are allowed to change the designation of modules (e.g., from additional to elective or vice-versa) only once throughout their entire study period. Consequently, most students opt to request this change shortly before completing their degree, as they will have access to the most information and can make better-informed decisions based on their completed modules.

In every semester there are two designated examination periods, and students can choose in which period they want to write the exam. The examinations of the blocked modules are held at the end of the respective block period; those for the unblocked modules are held in the two examination periods that

follow the lectures. The first examination period starts directly after the end of the lecture period, the second examination period takes place shortly before the lecture period of the next semester starts.

Withdrawal from a registered module examination is possible until 7 days before the examination date. The right to be admitted to an examination expires if:

- the examination of any module has been failed for the third time
- not all module examinations have been passed by the end of the seventh semester at the latest.
- the Master's thesis has not been registered by the beginning of the seventh semester at the latest.

The right to be admitted to an examination does not expire if the candidate cannot be held responsible for the failure to comply with the deadline. The students are responsible for complying with these examination deadlines as well as all other regulations given in the examination regulations. The examination regulations are distributed by the Examinations Office.

Please note that plagiarism—copying text or phrases in a written examination (even as part of a partial performance) without quoting them accordingly—will be marked as a cheating attempt and the respective examination performance is to be graded "fail" (F; mark 5.0). A declaration (available at: agrar.uni-hohenheim.de/en/plagiarism) has to be attached to homeworks, presentations, and to the Master's thesis.

3.1 Registering for Examinations

Students have to register for the examinations of each semester at the examination office using HohCampus. The registration must take place during the time period announced at the examination office. When you have to register for an examination depends on whether it is a blocked or a non-blocked module. More information on examination periods and dates, deadlines for registration, withdrawal, and resits is given at the homepage of the examination office (uni-hohenheim.de/en/examination).

Please note: the ILIAS registration is only for participation in the module and is NOT a registration for the examination!

3.2 Exam Repetition

If an exam is failed, the Examinations Office will inform the student via post. Students are responsible for checking in HohCampus or with the responsible professor about dates for resit exams and registration deadlines. Resit exams for blocked modules will usually be scheduled by the responsible professor within the same semester. Resit exams in unblocked modules will usually be scheduled for the next examination period. Students are not obliged to take a re-exam in the next possible examination period but can choose to take it in one of the later examination periods, if they wish.

4 MARKS AND GRADES

With each completed module, students earn credits for the workload associated with each module. The M.Sc. program has a requirement of 120 credits in total. The credit point system used in the M.Sc. program is fully compatible with the European Credit Transfer System, ECTS.

The examination result is expressed in grades and marks. The highest score is 1.0 [grade A]. A score of 4.0 [grade D] is required for passing.

	Marks and Grades		
	grades		score
excellent performance	very good	A	1.0
	good	A-	1.3
performance considerably exceeding the above average standard	good	B+	1.7
		B	2.0
		B-	2.3
performance meeting the average standard	medium	C+	2.7
		C	3.0
		C-	3.3
performance meeting minimum criteria	pass	D+	3.7
		D	4.0
performance not meeting minimum criteria	fail	F	5.0

The final score is calculated as an average score weighted according to the credits achieved in all modules and the thesis.

The final, weighted average of received scores results in a final grade for the Master's degree according to the table below:

between 1,0 and 1,5 = very good (A)

between 1,6 and 2,5 = good (B)

between 2,6 and 3,5 = medium (C)

between 3,6 and 4,0 = pass (D)

Additional and non-graded modules will not be included in the calculation of the final average grade.

5 SEMESTER STRUCTURE

The academic year at the University of Hohenheim is structured into two semesters, a winter semester (October until March) and a summer semester (April until September). The lecture period of each semester usually lasts 14 weeks (winter as well as summer semester).

Winter semester (WS) courses usually begin in the middle of October and end in February of the following year. Summer semester (SS) courses begin the first Monday in April and by end of July / beginning of August. For unblocked modules, the lecture period of each semester is followed by an examination period of three weeks. The last block period of each semester overlaps with this examination period for the unblocked modules. (See here uni-hohenheim.de/en/semester-dates and also back side of this brochure for important semester dates)

6 PROGRAM DESIGN

The two-year M.Sc. program consists of 90 credits in thematic modules and one research semester (30 credits), during which a Master's thesis has to be done. Five of these modules are compulsory (31.5 credits) and a minimum of 24 credits (four modules) have to be chosen from a list of semi-elective modules.

To create an individual study profile, five elective modules (at least 30 credits) have to be done. These modules can be chosen from the complete catalog of the University's agricultural master's modules

(see: uni-hohenheim.de/en/module-catalogue). Modules can also be chosen from other study programs at the University of Hohenheim, at another German university, or a foreign university, insofar as these are approved by the examination board.

1 st Semester (unblocked)	2 nd Semester (blocked)	3 rd Semester (unblocked)	4 th Semester
3080-440 (Gallmann) Agricultural Production and Residues	3103-450 (Streck) Spatial Data Analysis with GIS (7.5 credits)	Elective or semi-elective module	Master Thesis (30 credits)
4902-440 (Boysen-Urban) Economics and Environmental Policy	Elective or semi-elective module (7.5 credits)	Elective or semi-elective module	
3103-510 (Streck) Environmental Modelling	Elective or semi-elective module (7.5 credits)	Elective or semi-elective module	
3402-420 (Piepho) Quantitative Methods in Biosciences	Elective or semi-elective module (7.5 credits)	Elective or semi-elective module	
Elective or semi-elective module		Elective or semi-elective module	

6.1 Compulsory Modules

Sem	Code	Name of Module	Duration	Credits	Professor
1	3080-440	Agricultural Production and Residues	1 semester	6	Gallmann
1	3103-510	Environmental Modeling * *(AIDAHO specialization)	1 semester	6	Streck
1	4902-440	Economics and Environmental Policy	1 semester	6	Boysen-Urban
1	3402-420	Quantitative Methods in Biosciences *(AIDAHO specialization)	1 semester	6	Piepho
2	3103-450	Spatial Data Analysis with GIS * *(AIDAHO application)	SS block 1	7.5	Streck

SS = summer semester; * Limited number of participants. Please register for participation on ILIAS

6.2 Semi-elective Modules

Four semi-elective modules have to be selected from the following list:

Sem	Code	Name of Module	Duration	Credits	Professor
1	4906-410	Ecology and Agroecosystems *	1 semester	6	Graß
1	4903-500	Policy Processes in Agriculture and Natural Resource Management	1 semester	6	Birner
1	4908-440	Livestock Production Systems and Development	1 semester	6	Roesel
2	3102-440	Environmental Pollution and Soil Organisms*	SS block 2	7.5	Kandeler
2	4905-470	Biodiversity and Genetic Resources *	SS block 2	7.5	Martin
2	4403-550	Postharvest Technology of Food and Biobased Products	SS block 2	7.5	Müller, J
2	4403-470	Renewable Energy for Rural Areas	SS block 3	7.5	Müller, J
2	4302-470	Landscape Change, Resilience, and Ecosystem Services * (not in 2025)	SS block 3	7,5	Bieling
2	3103-460	Environmental Science Project *	SS block 4	7.5	Streck

Sem	Code	Name of Module	Duration	Credits	Professor
2	3409-480	Fertilization and Soil Fertility Management in the Tropics and Subtropics	e-learning, by arrangement	7.5	Müller, T.
3	3090-410	Organic Farming in the Tropics and Subtropics	1 semester	6	Zikeli
3	3202-420	Global Change Issues *	1 semester	6	Schweiger
3	3409-440	Soil Fertility and Fertilization in Organic Farming	1 semester	6	Müller, T.
3	4403-440	Irrigation and Drainage Technology	1 semester	6	Müller, J.
3	4406-410	Waste Management and Waste Techniques	1 semester	6	Hafner
3	4907-410	Natural Resource Use and Conservation in the Tropics and Subtropics	1 semester	6	Asch
3	3103-410	Plant and Crop Modeling ^{*(AIDAHO application)}	Blocked in March	6	Priesack
(2)/3	3003-410	Food Safety and Quality Chains (probably offered in Summer 2025)	Blocked	6	Schöne

SS = summer semester; * Limited number of participants. Please register for participation on ILIAS

6.3 Recommended elective Modules

The elective modules can be chosen from the list below or from the modules of other Master's programs offered by the Faculty of Agricultural Sciences at the University of Hohenheim. On request to the examination board and with the approval of an academic counsellor or the program coordinator, modules can be chosen from other programs of the University of Hohenheim or other universities. With compulsory, semi-elective, and elective modules together, at least 90 credits have to be reached.

Suggestions for elective modules:

Sem	Code	Name of Module	Duration	Credits	Professor
1-4	3000-410	Portfolio-Module (Master)	open	1 – 7,5	Kruse, M.
1-4	3000-420	UNlcert III English for Scientific Purposes	open	7.5	Kruse, M.
1	4303-410	Analyzing Sustainability in Agri-Food Systems	1 Semester	6	Seufert
2	4905-430	Integrated Agricultural Production Systems	SS, block 2	7,5	Asch
2	3201-620	Vegetation and Soils of Central Europe *	SS, block 2	7,5	Schmieder
2	4906-430	Field Course Agroecology and Biodiversity *	SS, block 2	7,5	Graß
2	3101-570	Field Course Soils and Vegetation *	SS, block 3	7,5	Herrmann
2	4906-440	Agroecology and Biotic Resource Conservation *	SS, block 3	7,5	Graß
2	4907-430	Crop Production Affecting the Hydrological Cycle	SS, block 3	7,5	Asch
2	3201-600	Intensive Course Landscape Ecology	SS, block 4	7.5	Schurr
2	3201-420	Ecology of Alpine Vegetation	SS, block 4	7.5	Schmieder
2	1916-400	Pathogens, Parasites and their Hosts, Ecology, Molecular Interactions and Evolution *	SS, block 4	7.5	Mackenstedt
2	4905-460	Modeling of Agroecosystems	1 semester	6 (!)	Asch
2	4407-480	Introduction to Machine Learning in Python ^{*(AIDAHO basic)}	e-learning	7.5	Stein
2	3101-420	Int. Field Course Site Evaluation (Eng.+Ger.) *	Sept. 2025	7.5	Herrmann
3	1301-470	Chemistry of the Earth System and Pollution	1 semester	6	Strasdeit
3	1201-590	Agricultural and Forest Meteorology	1 semester	6	Wulfmeyer
3	1201-630	Weather and Climate Physics	1 semester	6	Wulfmeyer
3	3201-440	Ecology of Alien Invasive Plants and Weeds	1 semester	6	Sheppard
3	3201-570	Community and Evolutionary Ecology *	WS, block 2	7,5	Schurr
3	3201-580	Conservation Biology *	WS, block 3	7,5	Dieterich
3	3202-440	Plant Ecology *	WS, block 4	7,5	Schweiger

Sem	Code	Name of Module	Duration	Credits	Professor
3	3201-420	Methods in Landscape and Plant Ecology *(AIDAHO application)	4 weeks in March	7,5	Schurr
3	3402-480	Environmental and Ecological Statistics	1 Semester	6	Piepho
3	3603-480	Entomology	1 semester	6	Petschenka
3	4301-460	Fit for Innovation Support – Concepts, Methods and Skills	1 semester	6	Knierim
3	4302-420	Ethical Reflection on Food and Agriculture *	1 semester	6	Bieling
3	4302-500	Transformation Studies in Agri-Food Systems	1 semester	6	Bieling
3	4303-420	Communicating Sustainability in Agri-Food Systems *	1 semester	6	Seufert
3	4303-480	Enacting Local Transformation in the Agri-Food System *	1 semester	6	Seufert
3	4407-440	Einführung in die Künstliche Intelligenz	1 Semester	6	Stein
3	4407-510	Intelligent Robotics for Agriculture	1 Semester	6	Stein
3	4605-430	Microbiological Safety within the Feed and Food Production Chain	1 Semester	6	Hölzle
(3)/4	3201-480	International Field Course Mediterranean Ecosystems (offered only in even-numbered years)	Feb./Mar.+ SS, block 1	7.5	Schmieder

SS = summer semester, * Limited number of participants. Please register for participation on ILIAS

Based on a cooperation contract with the *University of Tübingen*, Hohenheim students can also join modules related to Geographical Information Systems (GIS) in Tübingen. These modules are taught in German and require previous knowledge in GIS! Students who are interested in joining these modules should contact Dr. Andreas Braun, Tel. +49-7071 29-78 940, an.braun@uni-tuebingen.de

More information is available at geographie.uni-tuebingen.de

Sem	Code	Name of Module	Duration	Credits	Professor
3	6501-410	GEO-76: Angewandte Geoinformatik	1 semester	6	Uni Tübingen
3	6501-430	GEO-77: Geomorphologie und Bodenlandschaftsmodellierung	1 semester	6	Uni Tübingen
3	6501-420	GEO 88 Angewandte Fernerkundung	1 semester	6	Uni Tübingen

6.4 Suggestions for thematic foci in EnviroFood

The following lists of semi-elective (SE) and elective (E) modules should give some orientation for possible thematic profiles within the EnviroFood program.

6.4.1 Profile “Environmental Management”

Sem	Code	Name of Module	Duration	Credits	Professor
2	3409-480	Fertilization and Soil Fertility Management in the Tropics and Subtropics (E)	e-learning by arrangement	7,5	Müller, T.
2	4905-430	Integrated Agricultural Production Systems (E)	SS, block 2	7,5	Asch
2	4905-470	Biodiversity and Genetic Resources (SE)	SS, block 2	7,5	Martin
2	4302-470	Landscape Change, Resilience, and Ecosystem Services * (E)	SS, block 3	7,5	Bieling
2	4403-470	Renewable Energy for Rural Areas (SE)	SS, block 3	7,5	Müller, J.
2	3103-460	Environmental Science Project (E)	SS, block 4	7,5	Streck
3	4302-420	Ethical Reflection on Food & Agriculture * (E)	1 semester	6	Bieling
3	4403-440	Irrigation and Drainage Technology (SE)	1 semester	6	Müller, J.

Sem	Code	Name of Module	Duration	Credits	Professor
3	4406-410	Waste Management & Waste Techniques (SE)	1 semester	6	Hafner
3	4904-460	Farm System Modelling (E)	First half of semester	6	Berger
3	4901-420	Poverty and Development Strategies ** (E)	1 semester	6	Zeller

6.4.2 Profile "Soil Resources and Land Use"

Sem	Code	Name of Module	Duration	Credits	Professor
2	3102-420	Project in Soil Sciences * (English + German) (E)	by arrangement	7,5	Kandeler
2	3201-620	Vegetation and Soils of Central Europe * (E)	SS, block 2	7,5	Schmieder
2	3202-460	Plant Ecology of Cultural Landscapes (E)	by arrangement	7,5	Schweiger
2	3102-440	Environmental Pollution and Soil Organisms * (SE)	SS, block 2	7,5	Kandeler
2	3101-570	Field Course Soils & Vegetation* (E)	SS, block 3	7,5	Herrmann
2	3201-430	Ecology of Alpine Vegetation (E)	SS, block 4	7,5	Schmieder
2	3103-460	Environmental Science Project (E)	SS, block 4	7,5	Streck
3	4403-440	Irrigation & Drainage Technology-(SE)	1 semester	6	Müller, J.
2/3	3409-480	Fertilization and Soil Fertility Management in the Tropics and Subtropics (E)	e-learning by arrangement	7,5	Müller, T.
3	3409-440	Soil Fertility and Fertilization in Organic Farming (E)	1 semester	6	Müller, T.
3	3402-480	Environmental and Ecological Statistics (E)	1 Semester	6	Piepho
3	3103-410	Plant and Crop Modeling (SE) *(AIDAHO application)	in March	6	Priesack

6.4.3 Profile "Ecosystems and Biodiversity"

Sem	Code	Name of Module	Duration	Credits	Professor
2	3201-620	Vegetation and Soils of Central Europe * (E)	SS, block 2	7,5	Schmieder
2	4905-470	Biodiversity and Genetic Resources (SE)	SS, block 2	7,5	Martin
2	3101-570	Field Course Soils and Vegetation * (E)	SS, block 3	7,5	Herrmann
2	4302-470	Landscape Change, Resilience, and Ecosystem Services * (E)	SS, block 3	7,5	Bieling
2	3201-600	Intensive Course Landscape Ecology * (E)	SS, block 4	7,5	Schurr
2	3202-460	Plant Ecology of Cultural Landscapes (E)	by arrangement	7,5	Schweiger
3	3201-610	Project in Landscape Ecology * (E)	1 semester	6	Schurr
3	3402-480	Environmental and Ecological Statistics (E)	1 Semester	6	Piepho
3	3502-450	Population and Quantitative Genetics *(AIDAHO specialization) (E)	1 semester	6	Schmid
3	3603-480	Entomology	1 semester	6	Petschenka
3	4302-420	Ethical Reflection on Food and Agriculture*	1 semester	6	Bieling
3	4906-410	Ecology and Agroecosystems * (SE)	1 semester	6	Graß
3	3201-420	Methods in Landscape and Plant Ecology * *(AIDAHO application) (E)	4 weeks in March	7,5	Schurr
4	3201-590	Combining Ecological Models and Data * *(AIDAHO application) (E)	SS, block 1	7,5	Schurr

7 MASTER'S THESIS

The Master's thesis shows that the candidate is able to work independently on a problem in the field of "EnviroFood" within a fixed period of time by applying scientific methods. The exam consists of a written (thesis) and an oral (defense) part. The written part of the Master's thesis has to be completed within a period of six months and accounts for 30 credits. It is usually written during the fourth semester. Thesis work includes a literature review, new and original data derived from field work, a period of writing-up and, finally, a presentation. The candidate has to defend the essential arguments, results, and methods of the thesis in a colloquium of 30-45 minutes. The thesis can be carried out either at the University of Hohenheim or at one of the various partner universities.

There are several possibilities for finding the right reviewer and the right topic. Sometimes you can find them from the homepage of the department or institute, or you can talk directly to a professor.

The Master's thesis has to be registered at the latest at the start of the seventh semester. Otherwise it is graded "fail" (F; mark 5.0).

8 TEACHING STAFF

The professors of the University of Hohenheim have broad experience in international research. Students also benefit from Hohenheim's network with academic partners worldwide. Guest speakers from partner universities as well as research, development, and policy institutions cover additional topics, enriching the curriculum with special fields of expertise.

9 ACADEMIC COUNSELLING

Academic counsellors advise students on their choice of modules to design their individual study profile and to support smooth and focused study progress. If a student wants to select modules offered by a faculty other than the Faculty of Agricultural Sciences, they have to be approved by the academic counsellor or the program coordinator beforehand. Students can contact these counsellors at any time and ask for an appointment.

Academic counsellors for EnviroFood and their respective research focus:

- Prof. Dr. Streck, Soil Science, Biogeophysics, Environmental Modelling, thilo.streck@uni-hohenheim.de
- Prof. Dr. Bieling, Societal Transition and Agriculture, claudia.bieling@uni-hohenheim.de
- Prof. Dr. Hölzle, Livestock Infectiology and Environmental Hygiene, ludwig.hoelzle@uni-hohenheim.de
- Prof. Dr. Georg Petschenka, Applied Entomology, georg.petschenka@uni-hohenheim.de

10 STUDY ABROAD

Students are encouraged to spend one semester in the second year at a partner university abroad, to gain additional experience and further strengthen their individual profile. Our credit point system is intended to facilitate the mutual acceptance of courses attended at different universities. Assessment is based on the European Credit Transfer System (ECTS), which facilitates this kind of international mobility. Particularly, the third semester is suitable for integrated study abroad. Students will preferably spend

this time at one of the partner universities of the Euro League for Life Sciences (ELLS): euroleague-study.org/en/universities

On the basis of an agreement on quality standards, the members of the Euro League for Life Sciences have agreed to mutually recognize study achievements. Students may also request to spend the semester at universities other than those of the ELLS network.

For more information, consult the website of the Office of International Affairs (uni-hohenheim.de/en/office-of-international-affairs).

Coursework and examinations that have been completed during the program at a university abroad can be recognized as compulsory, semi-elective, or elective modules as part of this degree program. The examination regulations define the conditions of recognition. How you have to proceed for recognition is explained in detail on the pages of the examination office for this study program under the header "Recognition".

11 DEGREE

After successful completion of all modules as well as the thesis, the student is awarded the degree "Master of Science" (M.Sc.). This degree entitles the student to continuing with a Ph.D./doctoral program if the total grade is above average.

12 CAREER PERSPECTIVES

Graduates acquire the knowledge to analyze and understand ecosystemical, economic, political, and administrative interdependencies and develop integrative solutions for problems.

They are well qualified to work in:

- environmental and quality management in companies and organizations
- agricultural and environmental consulting companies
- research and development for international companies and organizations
- research institutions

Examples of EnviroFood graduates can be found here: uni-hohenheim.de/envirofood-alumni

13 ENVIROFOOD PROGRAM DIRECTOR

Prof. Dr. Thilo Streck,
University of Hohenheim
Department of Biogeophysics,
Institute of Soil Science (310d)

Lecture Periods at UHOH

WS 24/25	First day of <u>un</u>blocked modules:	(42. KW) Monday, 14 Oct 2024
	First day of blocked modules:	(42. KW) Monday, 14 Oct 2024
	Last day of unblocked modules:	(5. KW) Saturday, 01 Feb 2025
	Last day of blocked modules:	(7. KW) Friday, 14 Feb 2025
SS 25	First day of <u>un</u>blocked modules:	(14. KW) Tuesday, 1 April 2025
	First day of blocked modules:	(14. KW) Tuesday, 1 April 2025
	Last day of unblocked modules:	(28. KW) Saturday, 12 July 2025
	Last day of blocked modules:	(30. KW) Friday, 25 July 2025

No lectures: All Saints' Day: Fr, 01 Nov 2024,
Christmas holidays: Mon, 23 Dec 2024 – Mon 06 Jan 2025,
Easter: Fri, 18 Apr – Mon, 21 Apr 2025,
International Labor Day: Thurs, 01 May 2025,
Ascension: Thurs, 29 May 2025,
Pentecost: Tues, 10 June 2025 – Sat, 14 Jun 2025 (excursions might take place during that week!),
Corpus Christi: Thurs, 19 Jun 2025.

Examination periods for the winter semester 2024/25:

1st examination period: Mon, 03 Feb – Fr, 21 Feb 2025

2nd examination period: Mon, 03 Feb – until 7 days before the second date

Examination periods for the summer semester 2025:

1st examination period: not yet defined

2nd examination period: not yet defined
